

**All The Way
Indigo Girls**

ALL THE WAY (Emily Saliers)

capo on 4th fret

G	D	C	G
I	wasn't	looking to	shift my direction
A7			C
My	eyes	straight ahead	hands ten
D			
and	two		

G **D** **C** **G**
The gravity of our first connection
A7
Veering off the road
 C **D**
and into you

Em D C G
All the people drive by slowly gawking at the scene
Em7 D C D
Of the smoldering inevitable spark and gasoline

Em C
All the way I
G D
met you head on full speed
C G D
At the heart the blue flame burns

All
the way I took the crash course impact

But have I learned all that I'm
supposed to learn

No amount of playing safe could save me from this day

The head seeking path of my trajectory

Didn't we coolly

divest of predestination

Slamming into futures we can't see

I
know what can happen when there's more than meets the eye

But there's no
way to avoid it just get in the car and drive

All the way I met
you head on full speed

At the heart the blue flame burns

All the
way I took crash course impact

But have I learned all that I'm supposed
to learn

It makes me laugh, we're talking over tea

When
I can still smell the smoke on my sleeve

Steaming like gun smoke the
wreckage of our past

The scene of a crime I still can't leave

Oh
you and me, we should let well enough be

But each revisitation points to
clues

There's the oil slick of uncertainty

And warning signs back
there we didn't use

At least we laugh about it now how we escaped alive

It's remarkable the mess we make and what we can survive
