```
All The Way
Indigo Girls
ALL THE WAY (Emily Saliers)
capo on 4th fret
                                           G
I wasn t looking to shift my direction
                                            C
My eyes straight ahead hands ten
and two
          D C
The gravity of our first connection
Veering off the road
               D
           C
and into you
                                                             G
Em
All the people drive by slowly gawking at the scene
Em7
                                                        D
Of the smoldering inevitable spark and gasoline
Em
All the way I
                               D
met you head on full speed
                                   D
At the heart the blue flame burns
All
the way I took the crash course impact
But have I learned all that I m
supposed to learn
No amount of playing safe could save me from
```

The head seeking path of my trajectory
Didn t we cooly

this day

divest of predestination

Slamming into futures we can t see

Ι

know what can happen when there s more than meets the eye

But there s no

way to avoid it just get in the car and drive

All the way I met you head on full speed

At the heart the blue flame burns

All the

way I took crash course impact

But have I learned all that I m supposed to learn

It makes me laugh, we're talking over tea

When

I can still smell the smoke on my sleeve

Steaming like gun smoke the wreckage of our past

The scene of a crime I still can t leave

Oh

you and me, we should let well enough be

But each revisitation points to clues

There s the oil slick of uncertainty

And warning signs back there we didn t use

At least we laugh about it now how we escaped alive

It s remarkable the mess we make and what we can survive
