All The Way Indigo Girls

ALL THE WAY (Emily Saliers)

-----

capo on 4th fret

F# C# B F#

I wasn t looking to shift my direction

G#7 B

My eyes straight ahead hands ten

C#

and two

F# C# B F#

The gravity of our first connection

G#7

Veering off the road

B C#

and into you

Ebm C# B F#

All the people drive by slowly gawking at the scene

Ebm7 C# B C#

Of the smoldering inevitable spark and gasoline

Ebm E

All the way I

F# C#

met you head on full speed

B F# C#

At the heart the blue flame burns

All

the way I took the crash course impact

But have I learned all that I m

supposed to learn

No amount of  $% \left( 1\right) =\left( 1\right) =\left( 1\right)$  playing safe could save me from this day

The head seeking path of my trajectory

Didn t we cooly

divest of predestination

Slamming into futures we can t see

Ι

know what can happen when there s more than meets the eye

But there s no

way to avoid it just get in the car and drive

All the way I met you head on full speed

At the heart the blue flame burns

All the

way I took crash course impact

But have I learned all that I m supposed to learn

It makes me laugh, we're talking over tea

When

I can still smell the smoke on my sleeve

Steaming like gun smoke the wreckage of our past

The scene of a crime I still can t leave

Oh

you and me, we should let well enough be

But each revisitation points to clues

There s the oil slick of uncertainty

And warning signs back there we didn t use

At least we laugh about it now how we escaped alive

It s remarkable the mess we make and what we can survive
