divest of predestination Slamming into futures we can t see Ι know what can happen when there s more than meets the eye But there s no way to avoid it just get in the car and drive All the way I met you head on full speed At the heart the blue flame burns All the way I took crash course impact But have I learned all that I m supposed to learn It makes me laugh, we're talking over tea When I can still smell the smoke on my sleeve Steaming like gun smoke the wreckage of our past The scene of a crime I still can t leave Oh you and me, we should let well enough be But each revisitation points to clues There s the oil slick of uncertainty And warning signs back there we didn t use At least we laugh about it now how we escaped alive It s remarkable the mess we make and what we can survive
