Em

To greet and treat me like a neighbor

John brings the country to me

The girl from the city

John knows that he could make a killing

Selling rights to fish the trout

To rich city men who come in

Grilling and swilling

So he d rather do without

Still he opens up the gates for me

Atlanta groceries in my SUV

Doesn t take to waste or finery

But takes the girl in from the city

His mama goes to the local Baptist church

His daddy s buried there

His daddy did two tours of duty

As a gunner in the war

And was the first

To greet and treat me like a neighbor

John brings the country to me

The girl from the city

And he kindly tolerates

The wanderer in me

Who wishes she were from

Somewhere she would rather be

Planting tender shoots

Along a rushing stream

Welt everybody has a dream

The girl from the city
