```
Burn For You
INXS
G
It s no use pretending
That I understand
The hide and seek we play with facts
Changes on demand
CHORUS :
Take my hand, at the start
And the shadows, they burn dark
Love me, and I ll burn for you
              F#m
                                 Α
                                      Bm
And the love song ll never stop
Then the next verse is in D: ie:
I like the look in your eyes
When you talk that certain way
                                      G
                                          F
                                              Е
I love the day, and the night
When you know that lovers way
Then back to G: ie:
Minding my own business
When you came along
Temperature was running hot
Fever was so strong
Another Chorus :
It s always an adventure
The fantasy we make a fact
                           G
                         Α
Your the secret I desire
```

F

I can t keep that to myself G
When we re not together
G
It doesn t feel so bad
G
We could be so far apart
G
But our love s not sad

\mathbf{G} \mathbf{E} \mathbf{F} \mathbf{C} (4 times)

Another chorus : End in ${\bf G}$
