The same chords in the verse and the chorus:

I won't feel the magic, if it's in the air
deeper if it was I'd probably wouldn't even care
there's one thing that I'm hoping, my only wish is this
That we find each other, cause you're exactly what I need
I don't need a new red dress, I just want a bit of your time
Nobody lighting up the tree this year
Cause nothing shines when you're not here

[Chorus]

But tonight is the night, I've been waiting all that long for
And it's time, to find, the one thing that I've asked for
Shining from the roof top, singing to the sky
Let everybody see me, 'til the fable life
Cause you're here and now, let all your hearts unite
It's Christmas time

BRIDGE

D

I know I look stupid standing, under the mistletoe

Bm

Why you wanna keep me waiting?

G

Baby walk through that door, Let's gather around the fire

A

Let's gather around the fire, Share stories about this year

Share stories about this year

Let tonight be the night to remember

G

That there's no Christmas without you here

I've been waiting all that long for

D

the one thing that I've asked for

[Chorus]

But tonight is the night, I've been waiting all that long for
And it's time, to find, the one thing that I've asked for
Shining from the roof top, singing to the sky
Let everybody see me, 'til the fable life
Cause you're here and now, let all your hearts unite
It's Christmas time, it's Christmas time
It's Christmas time, it's Christmas time
It's Christmas time, it's Christmas time.
