

## Fallin

J. Holiday

That s my first tab so i hope you like it. I think It s very easy. If you think there are some things to change, tell me :)These are guitar tabs (Sorry for my bad

English, I m German)

The most in the Song it s **Am F C G** and one time its **Am F E E**

**Am**                    **F**                    **C**                    **G**  
I m half gone cause my lady ain t here.

**Am**                    **F**  
I been smoking and drinking,  
                         **C**                    **G**  
Just sitting here in my chair

SO YOU GO ON LIKE THIS

My tears are steady falling, I can t stop make em stop.  
I keep falling deeper baby.  
I ain t been the same since ya left with my heart.

One minute it was good the next it was bad.  
I wonder what happened to what we had.  
Girl you just left me without a sign  
I need you back before I lose my mind.

**Am**            **F**            **C**            **G**  
Girl I m falling and I can t get up baby.  
I m falling and I can t get up baby.  
I m falling and I can t get up babe,  
                 **Am**            **F**            **E**  
I m falling deeper, deeper, deeper deeper.

I got everything but I don t have you  
I can t help but think of all the thigns we used to do.  
Don t wanna hang in the streets cause I don t wanna find no one new.  
Girl you got ya hooks in me, got me stuck like glue.

One minute it was good the next it was bad.  
I wonder what happened to what we had.  
Girl you just left me without a sign  
I need you back before I lose my mind.

Girl I m falling and I can t get up baby.  
I m falling and I can t get up baby.  
I m falling and I can t get up babe,  
I m falling deeper, deeper, deeper, deeper.

Can you come catch me cause I think that I ve reached the end of my rope.  
And girl I just refuse to believe that we ve reached the end of the road.

Girl I m falling and I can t get up baby.  
I m falling and I can t get up baby.  
I m falling and I can t get up babe,  
I m falling deeper, deeper, deeper, deeper.
