[Riff 1]

```
          B         C#
I wanna wake up
                F#                             D#m7
and find my way out from in between these dreams
                          B          C#
It s better when we re together baby
              F#                        D#m7
You look so pretty sleeping next to me
                      B        C#
But you ll never never know
            F#
We feel so certain
                          D#m7
but we don t know a thing
                  B
Cept for when I wake up in the morning
        C#
and I m sitting in the shade
      F#                        D#m7
Eating banana pancakes we made
                    B          C#
With all the good people
              F#                D#m7
Really not so     hard to find
```

[Riff 2]

```
                  G#m
There s no other way

When my mind is a mess well
   C#
I think that its best that we wait
                        G#m
```

```
So I m sitting waiting wishing
                  C#
That you will believe in some kind of
       G#m
superstitions baby.
                C#                       G#m
Then you could see if we staple it together baby
                  C#
and call it bad weather

[Riff 3]

                    B     C#    F#     F#
Oh na na here I come
                  B     C#    F#
Oh now here I come

Em C#, dê apenas uma batida e toque:
