

Radiate

Jack Johnson

Hi guys :)

Since I didn't find anything on Jack's new hit Radiate yet, I decided to do my version of it. :)

I'm sure there's lots of more complicated ways to play it, but basically it's these chords. Contact me for corrections, requests, questions or anything :)
Hope you like it!

Jack Johnson - Radiate

G# Bbm

You walk into

G# Bbm

The world you make

G# Bbm

You lose yourself

G# Bbm

But you find your way

G# Bbm G# C#

Going to watch you radiate

We turn so slow

I know it's hard to wait

Take your time son

It's yours to take

Going to watch you radiate

These rocks they hold heat

Pools of water cool your feet

As you walk you believe

Every part of the dream

I see you lost

In what you create

All of time

In this one single day

You take it and you radiate

Follow your hands

As they build, as they shape

As they follow your mind

As it rolls like a wave

Take it and you radiate

These rocks they hold heat
Pools of water cool your feet
As you walk you believe
Every part of the dream

Hope you enjoyed! - mangomelodies.
