

**Miss California**  
**Jack's Mannequin**

**Am**                **C**                **F**                **Em**        **Am7**  
I called Jesus but he didn't check his phone today,  
**G**                                **F**  
Oh oh, there's my summer girl  
                                 **C**  
I've been wanting her  
             **G**                                **F**  
I hear she's got a boyfriend  
**Am**                                **C**                                **F**                                **Em**                **Am**  
Thought I could leave her for a season but it just got cold  
                                 **F**                                **C**  
Yeah, it's a lonely hour in my cellphone tower,  
             **G**                                **F**  
Broken down transmission.

**Am**                                **F**                                **C**                                **G**  
But I'm gonna take you to my boxcar on the beach  
**Am**                                **F**                                **C**  
And I'm gonna hang the sun above your bed  
             **G**                                **Am**                                **Em**  
And soak your hair in bleach

**F**                                **G**        **Am**                **F**  
You'll be missed, Miss California  
                                 **C**                                **G**        **Am**                **F**  
You'll be kissed by only me  
                                 **C**                                **G**                                **Am**        **Em**                **F**  
When they can't find you you'll turn into a mystery  
                                 **G**                                **F**  
But you're no mystery to me, Miss California

**Am**                **C**                                **F**                                **Em**                **Am7**  
I called Jesus but he heard I hurt his little girl, yeah,  
                                 **G**                                **C**  
with my reckless stare, I've been so unfair  
             **G**                                **F**  
Misplacing my affections  
**Am**                                **C**                                **F**                                **Em**                **Am**  
She had a reason not to take me back into her care  
                                 **F**                                **C**  
Oh, I'm just a stray dog now, I can't beg or bow  
             **G**                                **F**  
Just give me some direction.

**Am**                                **F**                                **C**                                **G**  
And I'm gonna take you to the mansion where I hide  
**Am**                                **F**                                **C**

and I m gonna paint a diamond on your hand

**G Am Em**

And you will be my bride

**F G Am F**

You ll be missed, Miss California

**C G Am F**

You ll be kissed by only me

**C G Am Em F**

When they can t find you you ll turn into a mystery

**G**

But you re no mystery to me, Miss California

**C**

Miss California

**G F Am**

I ll be around, I ll be around.

**F G Am F**

You ll be missed, Miss California

**C G Am F**

You ll be kissed by only me

**C G Am Em F**

When they can t find you you ll turn into a mystery

**G**

But not to me.

**F G Am F**

You ll be missed Miss California

**C G Am F**

We ll be married in the rain

**C G Am Em F**

When they can t find you I m sure I ll be the one they blame

**G**

But they can t prove anything

**F C**

Miss California

**F C**

Miss California

**G**

I ll be around

**Am F C ...**

Whoa...
