Somebody s going to attack
C#m
Somebody will tell you to pick a side
E

B
Somebody s gonna let you in
G#m
Judged on the color of your skin
C#m
Slam a door in the face of your friend
E
Simply because you don t look like him
G#m
And then you gotta find a way that you re wakin

Everybody s walkin
C#m
You gotta find the words to say when you re talkin
E
Everybody s talkin
B D#m G#m
So I built the wars into a song
C#m E B
I m hopin someone s singing along
D#m G#m
And even if some notes are wrong
C#m E B
I m hopin someone s singing along
B D#m
cause just one voice is not enough
G#m C#m
I need to hear from everyone
B D#m G#m
And even when I m dead and gone
C#m E B
I m hopin someone s singing along

Somebody s gonna build a wall
G#m
Then smash it with a cannon ball
C#m
Someone who somehow has got a gun
E

Will tell you who you can't and you can love

B

Some people keeping all the cash

G#m

They're gonna get away with that

C#m

Just 'cause some people don't think like me

E B

Does that really make them the enemy?

G#m

And then you gotta find a way that you're wakin

Everybody's walkin

C#m

You gotta find the words to say when you're talkin

E

Everybody's talkin

B D#m G#m

So I built the wars into a song

C#m E B

I'm hopin' someone's singing along

D#m

G#m

And even if some notes are wrong

C#m E B

I'm hopin' someone's singing along

B D#m

'cause just one voice is not enough

G#m C#m

I need to hear from everyone

B D#m

G#m

And even when I'm dead and gone

C#m E B

I'm hopin' someone's singing along

Make a noise, I can hear you now

D#m

Won't you raise your voice just a little louder

G#m

Make a noise, I can hear you now

E

Won't you raise your voice just a little louder

B D#m G#m

So I built the wars into a song

C#m E B

I'm hopin' someone's singing along

D#m

And even if some notes are wrong

G#m C#m E B

I'm hopin' someone's singing along

B D#m

'cause just one voice is not enough

G#m C#m

I need to hear from everyone
