

## Cloud 9

Jamiroquai

**Am7**                    **G**        **Dm7**                    **Am7**  
You pick me up, then you put me down  
**Am7**                    **G**                                    **Dm7**                    **Am7**  
Can't seem to find my way around ya  
**Am7**                    **G**        **Dm7**                                    **Am7**  
See what you think, when you don't think it now  
**Am7**                    **G**                                    **Dm7**                    **Am7**  
You lost my love but someone found it  
**Am7**                    **G**        **Dm7**                    **Am7**  
Now when the rain falls upon my head  
**Am7**                    **G**                                    **Dm7**  
I don't think of you that much at all  
**Am7**                    **G**        **Dm7**                    **Am7**  
Just one thing seemed to make you care  
**Am7**                    **G**                                    **Dm7**  
Who's gonna drive and take you home?

**A7**            **Dm7**                    **Fmaj7**                    **A**  
Only a fool could walk away from me this time  
**A7**                    **Dm7**                    **Fmaj7**                    **A**  
I look up to heaven, every star I see is mine  
**A7**            **Dm7**                    **Fmaj7**                    **A**  
Only a fool could walk away from me this time  
**A7**                    **Dm7**                    **Fmaj7**                    **A**  
I'm walking on air, and every cloud is cloud 9

**Am7**                    **G**        **Dm7**                    **Am7**  
You get your kicks playing stupid tricks  
**Am7**                    **G**                                    **Dm7**                    **Am7**  
But I've found another crush you got me now  
**Am7**                    **G**                                    **Dm7**                    **Am7**  
Game, set and match, don't seem to be no catch  
**Am7**                                    **G**                                    **Dm7**                    **Am7**  
I don't think she'll drive me to the wall  
**Am7**                    **G**                                    **Dm7**                    **Am7**  
We go out at night, and the world starts feeling right  
**Am7**                    **G**                                    **Dm7**                    **Am7**  
She don't care about Hollywood  
**Am7**                                    **G**                                    **Dm7**                    **Am7**  
I know you don't believe it, but this time I really mean it  
**Am7**                    **G**                                    **Dm7**  
I hope it's clearly understood

**A7**            **Dm7**                    **Fmaj7**                    **A**  
Only a fool could walk away from me this time  
**A7**                    **Dm7**                    **Fmaj7**                    **A**  
I look up to heaven, every star I see is mine

**A7**            **Dm7**                    **Fmaj7**                    **A**  
Only a fool could walk away from me this time  
**A7**                    **Dm7**                    **Fmaj7**                    **A**  
I m walking on air, and every cloud is cloud 9

**Am7**                    **G**                                    **Dm7**  
I m not the one, the one for you  
                  **Am7**

Can t change it, baby

**Am7**                    **G**                                    **Dm7**  
I m not the one, the one for you  
                  **Am7**

I know it, baby

**Am7**                    **G**                                    **Dm7**  
I m not the one, the one for you  
                  **Am7**

Can t change it, baby

**Am7**                    **G**                                    **Dm7**  
I m not the one, the one for you  
                  **Dm7**                    **Fmaj7**                                    **A**

Only a fool could walk away from me this time, yeah

**A7**  
I m not the one, the one for you

**Dm7**                    **Fmaj7**                                    **A**  
I look up to heaven, every star I see is mine  
                                  **A7**

I m not the one, the one for you  
                  **Dm7**                    **Fmaj7**                                    **A**

Only a fool, could walk away form me this time

**A7**                    **Dm7**                    **Fmaj7**                    **A**                    **Dm7**  
I m walking on air, and every cloud is cloud 9
