

**Under The Shadow**  
**Jason Upton**

UNDER THE SHADOW OF YOUR WINGS

JASON UPTON

Stanza 1:

**Bm**                                **G**                                **D**  
Iâ€™ve been running trying to find my refuge  
**Bm**                                **G**                                **D**  
Never stopping long enough to see  
**Bm**                                **G**                                **D**  
All the while you were right there waiting  
**Em**                                **F#m**                                **G**    **A**  
To hide me in the shadow of your wings

Chorus:

**D**                                **F#m**  
Under the shadow, under the shadow,  
                             **G**                                **D**                                **A**  
Under the shadow of your wings I will find my rest

Stanza 2:

**Bm**                                **G**                                **D**  
I get so thirsty trying to find your Presence  
**Bm**                                **G**                                **D**  
That I forget to stop and take a Drink  
**Bm**                                **G**                                **D**  
All the while you are right there wanting  
**Em**                                **F#m**                                **G**    **A**  
To pour your healing water over me

Bridge:

**G**                                **D**    **A**  
Itâ€™s only in you, itâ€™s only in you
