

**Turn My Life Down**  
**Jefferson Airplane**

Song: Turn My Life Down  
Album: Volunteers  
Artist: Jefferson Airplane  
Tabbed by: Leon (WinstonABoogie)  
Music & Lyrics(I guess): Jorma Kaukonen

I think the first part is 100% correct, but there are missing some parts at the end so if you play it and somehow find the chords please tell me and I will fix it.

Standart Tuning

**C**                    **G**                    **D**  
When I see you next time round in sorrow  
**C**                    **G**                    **D**  
Will you know what I been going through  
**C**                    **G**                    **D**  
My yesterdays have melted with my tomorrow  
                  **C**                    **G**                    **A**  
And the present leaves me with no point of view  
**C**                    **G**                    **D**                    **C**  
When I see you next time round look into my eyes  
                  **G**                    **D**  
Where we d be we never never could decide  
                  **C**                    **G**                    **D**                    **C**  
Oh my Borrowed moments they cannot fill the moments of our  
                  **G**                    **A**  
And wishful thinking leaves me no place to hide  
**D**                    **A**  
No place to hide  
**D**                    **A**  
No place to hide

3x **A D**

I think you have to play the A at the 12th fret and the D and G on the 10th fret.  
Play this part twice, the second time there s the solo.

**A**                    **D**                    **G**                    **A**  
I see the shadows softly coming  
**A**                    **D**  
Taking me into a place  
                  **A**                    **D**  
Where they turn my life down  
**G**                    **A**                    **A**                    **D**  
Leaving mourning with myself

**G**

**A**

And nothing to say
