

Send My Love To Linda
Jimi Hendrix

- Recorded in 1970, published in Both Sides of the Sky (2018). These are chords for the first half of the song before the solo section.
- The original is in Eb: tune half-step down if you want.
- The intro sounds Spanish. You can try to play E and to move you three fingers also at 2nd and 4th frets, playing the other strings opened.
- During the verses, Hendrix is tapping on the body of his strat. The choruses are played louder.
- If you find interesting riffs to add, let me know !
