With me

If you could see everyone s envy

When you walk around in your cowboy boots

That you found in a pile for a dollar at Wasteland

If you could see what I see

Like a crystal ball your blue eyes  
Tell me of our future and it s everything we dreamed

You don t need all of your problems  
To melt away like chocolate candies  
In your passenger seat on a hot August day

You have everything  
You really need  
Right here, right now  
You have everything  
That you really need  
Right here, right now  
With me

You don t need a million dollars  
To throw your head back laughing  
To tell yourself it s gonna be fine  
Really fine  
Really no problems, amazing, every moment is the moment  
You can choose, how you feel  
You decide what is real and you can make  
The truest love you can star in your own movie  
You can write this song and sing it back to me  
You can see the world is nothing if not love  
You can see the world is nothing if not love  
You can see the world is nothing if not love  
Love, love, love

You have everything  
That you really need  
Right here, right now  
You have everything  
That your really need  
Right here, right now  
With me  
Right here, right now  
With me
