B

A

Right here, right now

E

With me

If you could see everyone s envy

When you walk around in your cowboy boots

That you found in a pile for a dollar at Wasteland

If you could see what I see

Like a crystal ball your blue eyes
Tell me of our future and it s everything we dreamed

You don t need all of your problems
To melt away like chocolate candies
In your passenger seat on a hot August day

You have everything
You really need
Right here, right now
You have everything
That you really need
Right here, right now
With me

You don t need a million dollars
To throw your head back laughing
To tell yourself it s gonna be fine
Really fine
Really no problems, amazing, every moment is the moment
You can choose, how you feel
You decide what is real and you can make
The truest love you can star in your own movie
You can write this song and sing it back to me
You can see the world is nothing if not love
You can see the world is nothing if not love
You can see the world is nothing if not love
Love, love, love

You have everything
That you really need
Right here, right now
You have everything
That your really need
Right here, right now
With me
Right here, right now
With me
