                   G
Now it s simple to me
Sometimes you have to let go when there s
Next to nothing
You say yes every time she says no
There s more pain then love
It comes to shove almost
Every time you speak
Somehow you fight
                 Em
                       В7
Something s just crazy
Somehow it s taking all the life left in you
G Em C D
C
she s had time to heal
And she doesn t need you any longer and you
Had time to drink
And you call her to tell her you ve gotten much stronger
```

At three in the morning she says stop calling cause...

Everyone s asleep

```
C
               D
Some of us work
                  Em
                        в7
You re driving me crazy
I learned to get on with my life
C
Now every nights Friday night
Picking fights with your friends
Somehow trying to make amends
                  D
So you search for comfort in a friend
             Em
It s not the same she won t understand
You both learned to think alike
So what was so wrong
Where s she tonight
Out there drinking while you re left in thinking
It s taken all the life left in you
G Em C D
G
You re losing ground
Carrying that torch
You re not asking for much
Still somehow
You ll wait for her
You say she ll return
But you still carry that torch
That girl
```

WHIPPING BOY!!!
