Then drop me off where the music's loud, it won't get no better than this

INTRO

Take me to a party where I'm the only man

With 50 women waitin' on me who say they understand

Feed me milk and honey, give me a story that I'll never miss

Let me get one good night's sleep but it won't get no better than this

INTRO

Give me clear vision and don't let me miss anything

I'll take the bird that whistles and the world on a string

Fill my fists full of money in these troubled times

Let me share the water with all, all of mankind

Give me back my youth, don't let me waste it this time

Stand me up at the golden gates at the front of the line

Let me lie in the sunshine, covered in the morning mist

Then show me something I've never seen but it won't get no better than this
