Ok I hate peoples useless rambling at the beginning of their tabs but there are somethings

note here:

1. This SONG is played in on open tuning, I don t know what it is.
2. This TAB is in Standard tuning, so it won t sound the exact same but it is as
as I can figure it at this point.

Listen For the timing:

V1 Well I walk the walls
To be with you
Early night time morning comes so
soon

And on thursday night
New York Glow
While I was in your arms
Black water flows

PC And if you weren t told
Would you ever know

C Do you see me tonight
With the coins on my eyes
Loves sweet surprise
The light upon your Face
All the lovers at war
That roll down the line
Love felt so far
The light upon your face

V2 You know and while we lie
He is alone
What a lonely
Dream it alone

And you know there s nothing more
That I could say
I just close my eyes
Let you carry me away

PC And if you weren t told
Would you ever know

C Do you see me tonight
With the coins on my eyes
Loves sweet surprise
The light upon your Face
All the lovers at war
That roll down the line
Love felt so far
The light upon your face

Br Ya you know love is
Always lookin
For an open grave

Ya to lay down
And unfold it s arms
And Die

C Do you see me tonight
With the coins on my eyes
Loves sweet surprise
The light upon your Face
All the lovers at war
That roll down the line
Love felt so far
The light upon your face

There is a couple of chords that I think could sound better.. please leave
comments or
me with any suggestions. This song definately needs to be out there because it
is very
to play (even in the wrong tunning).
