Shepherd Of My Heart
Johnny Cash

```
C                                                   F
You re the shepherd of my heart, so treat it tenderly
      C                                      G7
It s a heart that needs your ever loving care
              C                             F
You re the shepherd of my heart, until eternity
      G7                          C
Lead it not into the valley of despair

F                            C
While it s in your keeping, guard it with your love
                                    G7
Shelter it from harm along life s way
            C                               F
You re the shepherd of my heart and darling honestly
      G7                          C
It s a heart that will not ever go astray
```

You re the shepherd of my heart so surely you must know
You have but to speak and my heart will obey
It s at your command my dear because it loves you so
So my darling shepherd guide it where you may

If it be green pastures or a rocky road
It will follow you and not ask why
You re the shepherd of my heart until the trumpet blows
And I go to meet the shepherd in the sky
