(Youre the only one worthy

```
Fully In Love
Jon Thurlow
Original key C# (put a capo on the first fret using the C chords)
Fully In Love
Jon Thurlow
Capo 1: C (C#)
Chorus:
       G
               Am
Oh Oh Oh Oh
                                                 G
                                                                F
I just want a heart that is fully in love
Verse:
                                                            G
The love that you have for Jesus, put it inside of me
Burn it on my heart, like a seal, like a seal
That in the famines of your presence
Or in the floods of persecution
Or in the comfort of the culture
                                            F
Its still real, Its still real
Bridge:
Its what you wanted in the Garden
Its what you wanted on the mountain
Its what you wanted on the cross beam
                                         G
                                                      F
Just a heart that is fully in love
Bridge 2:
                                                            G
Am
God I cry out for fire (the fire of Your love)
                                                 C
                                                                       G
Come set your seal upon me (upon my heart)
