```
Zion And Babylon
Josh Garrels
Chords
G, C9, D, A9
D* 003233
Capo 4
G C9 G C9
G
Oh great mammon of form and function
Careless consumerist consumption
Dangerous dysfunction
C9
Described as expensive taste
Im a people disgraced
By what I claim I need and what I want to waste
I take no account for nothing
                 C9
If its not mine
Its a misappropriation of funds
Protect my ninety percent with my guns
Whose side am I on?
                    C9
Well whos winning?
My kingdoms built with the blood of slaves
C9
Orphans, widows, and homeless graves
                                                                       C9
I sold their souls just to build my private mansion
Some people say that my time is coming
Kingdom come is the justice running
                                         C9
Down, down, down on me
```

C9

Im a poor child, Im a lost son

```
G
                                              C9
I refuse to give my love to anyone,
                      Α9
Fight for the truth,
                                   G
Or help the weaker ones
                  D^*
                                       C9
                              G
Because I love my Babylon
                                           C9
I am a slave, I was never free
                                              C9
I betrayed you for blood money
                                                G
Oh I bought the world, all is vanity
                                          C9
Oh my Lord Im your enemy
C9 G C9 G C9
              C9
                                          C9
G
Come to me, and find your life
              C9
                                   C9
Children sing, Zions in sight
I said dont trade your name for a serial number
C9
                                                               G
Priceless lives were born from under graves
Where I found you
Say, my name aint yours and yours is not mine
C9
                                                          G
Mine is the Lord, and yours is my child
                                         C9
Thats how its always been
Time to make a change leave your home
Give to the poor all that you own
                                                        C9
Lose your life, so that you could find it
First will be last when the true world comes
Livin like a humble fool to overcome
The upside-down wisdom
Of a dying world
Zions not built with hands
And in this place God will dwell with man
```

```
G
Sick be healed and cripples stand
Sing Allelu
My kingdoms built with the blood of my son
Selfless sacrifice for everyone
                                      C9
Faith, hope, love, and harmony
I said let this world know me by your love
      C9
By your love
      G
                  C9
By your love
                                               C9
Oh my child, daughters and sons
                                              C9
I made you in love to overcome
                                                G
Free as a bird, my flowers in the sun
              D^*
                                   C9
On your way to Mount Zion
                                     C9
All you slaves, be set free
                                                                          C9
Come on out child and come on home to me
We will dance, we will rejoice
                                                   C9
If you can hear me then follow my voice
```
