**C G Em D**  
One million reasons why, you shouldn't even try.

After all you're just one heart, a single candle in the dark.  
**C G Em D**  
And there are shadows here, feeding on your fears,  
**C G Em D**  
That you don't have what it takes - who are you to make a change?

Pre-Chorus:

**C G Em D C G Em D**  
But oh, oh, don't underestimate the God you follow.

**C G Em D**  
Whatever you do, just don't look back.

The city on a hill, it should be shining still.

Every sinner saved by grace, has a purpose, has a place

Inside the bigger plan, we might not understand.  
**C G Em D**  
But if we just keep walking on, we will see the Kingdom come, yeah.

(Let your lights all shine)

When you feel like you're too small

(Let your lights all shine)

To do any good at all

(Let your lights all shine)

Like a sunrise through the window

(Let your lights all shine)

Like a symphony crescendo

(Let your lights all shine)

We are waking up again, we are rising from the dead

(Let your lights all shine)

We are shining like the stars, we are pushing back the dark

(Let your lights all shine)

Yeah, we are pushing back, pushing back the dark

(Let your lights all shine)

We are pushing back, we are pushing back, pushing back the dark

(Let your lights all shine)

Just pushing back, we are pushing back, pushing back the dark

(Let your lights all shine)
