

Shot Down

Josh Woodward

Shot Down - Josh Woodward

Capo 6

**C**                    **G**                    **Am**                    **F**  
Why even try to justify leaving, why not just run away?  
**C**                    **G**                    **Am**                    **F**  
Why even wait and hesitate breathing, why would you want to stay?  
**C**                    **G**                    **Am**                    **G**  
Nothing you say could change the way he feels, nothing could save you now  
**D/F# F G**  
So just let this go

**C**                    **G**                    **Am**                    **F**  
Every collapse that came to pass, faded out of your memory  
**C**                    **G**                    **Am**                    **F**  
All of the times he left you blind, jaded, down on your aching knees  
**C**                    **G**                    **Am**                    **G**  
Why don t you see the lies that he s telling, why don t you give it up?  
**D/F# F G**  
And just let him go

[Chorus]

**Am G F C**  
Shot down, with no sound  
**Am F G**  
To the cold ground below  
**Dm Am G**  
And there s no one around, you won t be found  
**D/F# F**  
So hang your head and [let it fade away]

**C**                    **G**                    **Am**                    **F**  
Your heart on a string, without a wing flying, no one to hold the kite  
**C**                    **G**                    **Am**                    **F**  
He let you go, but still you blow by, oblivious to the height  
**C**                    **G**                    **Am**                    **G**  
Check out behind and you will find nothing s holding you to the ground  
**D/F# F G**  
He just let you go

(Chorus)

**G C G F Am G**  
Don t let him pull you down, just let him drown alone  
**F C G/B Am G D/F# F**  
You ll land, and someday you will find a truer hand
