

Sky

Joshua Radin

So I wanted the chords for this awesome song and when I saw there were none I made my own and thought I'd share. This is my first tab so I guarantee you some parts are a bit rough but I think it'll do.

Feel free to make it better!

Verse:

**G**                                  **D**                                  **C**          **G**                                  **D**  
I woke dreaming we had broke dreaming you left me for some one new  
          **G**  **D**  **C**                                  **G**  
And you cried, drying those brown eyes, crying you're sorry but sorry  
          **D**          **G**  
won't do.

**D**                                  **C**  
This is the way I need to wake  
          ?          **Am**          **G**  
I'll wake to you  
                                  **D**  
And you never left me  
                                  **C**                                  ?          **Am**  
All that I'd dreamed had been untrue  
**C**                                  **D**          **G**  
Open my eyes; I see sky

Chorus:

**D**  
Oh, oh, oh woah, no  
**C**                                  **D**  **G**  
The way to keep me on my toes  
                                  **D**  
I, I, I will be fine  
**C**                                  **D**  **G**  
Just say you'll stay forever mine  
                                  **D**                                  **C**                                  **D**                                  **G**  
Til we fall asleep tonight

Verse:

**D**                                  **C**                                  **G**                                  **D**  
Last night we had a great fight I fell asleep in a horrible state  
**G**  **D**  **C**  
Then dreamt that you loved my best friend My heart would not mend  
**G**                                  **D**          **G**  
Seemed it was fake  
                                  **D**                                  **C**  
But this is the way I need to wake  
          ?          **Am**          **G**  
I'll wake to you
