```

Verse I:

```

C                               Am
A faded wedding photograph, you and me in our first dance
F                               G
Your eyes are closed we're lost in one sweet embrace
C                               Am
Since those days the world has changed, but our love remains the same
F                               G
God knows we've had our share of saving grace
      Am                               G
And I'm proud of all the blessings you have given me
      Am                               F
The mountains we have climbed to get this far
      Dm                               Dm7                               F
You've learned to take the laughter with the tears
G                               Intro
After all these years

```

Verse II:

```

C                               Am
You make it feel brand new, after the fires that we walked through
F                               G
Against the odds we never lost our faith
C                               Am
In our hearts we've made our home, where our children all have grown
F                               G
Precious moments time can not erase
      Am                               G
We've been livin' up and down the gypsy highway
      Am                               F

```

Seasons that we've learned to share apart
Dm Dm7 F
Somehow in my heart I always keep you near
G C
After all these years

CHORUS:

After all these years you stood by me the days and nights that I was gone
Am F C G
After all these years you sacrificed, believed in me and you stood strong
Am F C G
Dm Dm7 F
Cause with our love there's nothing left to fear
G C
After all these years

Solo: C-Am-F-G (2x)

REPEAT CHORUS

Outro: C-Am-F-G-C
