Sing myself to sleep
JP Saxe

Intro: Asus
```
        D
I'm okay
     D/C
But that's not the point
          G
Take it day by day
              G#dim
Like there's any other choice
D              F#7           Bm
 Maybe I'm a little too at ease
   G                          A
I didn't always sing myself to sleep

          D
You're still with me
         D/C
That's what people who love me say
       G
And I hope I figure out
      G#dim
How to believe them someday
D                         F#7                    Bm
'Cause I think that's something that I'm gonna need
G            A            D
I didn't always sing myself to sleep

          G                     A
You sang me lullabies in other languages
      Bm                        E/G#
And I still don't know what they mean
       G                 A
Like a little piece of you to know
       Bm                A/C#
That's still there left for me

    D
I'm okay
     D/C
But that's not the point
     G
And either way
G#dim
I'm still your boyA                     Bbdim                     Bm
I hear your voice in my mind, bringing me peace
G            A           Bm
I didn't always sing myself to sleep
```

```
G                    A                Bm
I didn't always sing myself to sleep
```

```
G                    A                Bm
I didn't always sing myself to sleep
```
