

The Green Manalishi
Judas Priest

From: kevin@sherman.pas.rochester.edu (kevin mcfadden)

Ok, tag team time.....

I worked out most of this a few months ago. I am not very good at figuring fast leads, so this is missing a few breaks and the solo. Listen to the song and put it together, there aren't very many chords and you can simulate the lead breaks with your favorite pentatonic (Em? I think the song is in C...) Actually, this is a good song to start learning how to transcribe. It is probably the third I have figured out since trying this method. I am just going to post this in parts because I am doing this from memory.

Green Manalishi
by Judas Priest

Transcribed by Kevin McFadden

Chords are just your standard power chords.

I = root on E, II = root on A

INTRO:

EII DII EII GII GII GII EII EII EII

DII EII DII EII DII CII CII BII CII

-----12-----
-----2-3-5---5-3-2-----12---14-----
2-2-3-5---5-----5---\14-----

VERSE:

[muted EI, or EII with open E, for a while then...]

EII EII EII GII AII GII AII GII EII

I really think that is it. Just play around with those chords and tab above. If there is anything I missed post the addendum.

Regards,

Kevin
