

**From Your Hands**  
**Julian Drive**

Verse 1

**G(w/D)**                    **D2**                    **Asus**  
Praying in the garden, You saw the crowd coming  
**G(w/D)**                    **D2**                    **A4**  
Betrayed by one that called You King  
**G(w/D)**                    **D2**                    **A4**                    **Bm**  
You could have called a band of angels to come and save the day  
**G(w/D)**  
But instead You chose to stay, You didn t run away

Chorus

**D**                    **A**                    **Bm**                    **G**  
In the very front of Your mind While the blood was flowing  
**D**                    **A**                    **Bm**                    **G**  
You saw my face as You cried Certain in knowing  
**D**                    **A**                    **G**  
Tears, blood and pain in the sand  
**E**                    **G**                    **A**  
True love was pouring, True love was pouring from Your hands

Verse 2

**G(w/D)**                    **D2**                    **A4**  
Bruised and beaten, appeared You were defeated  
**G**                    **D2**                    **A4**  
But things aren t always what they seem  
**G**                    **D2**                    **A4**                    **Bm**  
They thought when they placed Your body into an empty grave  
**G**  
It would end all debate But the stone was rolled away

Repeat Chorus

Bridge

**Bm**                    **G**                    **D**                    **A**  
The same hand that washes clean, and sets the captive free  
**Bm**                    **G**                    **D**                    **A**  
Same hand that calmed a sea, and the one who rescued me

Repeat Chorus 2X
