Play with little flourishes to spice it up a little or something. He does something in the actual song but I can't figure it out.

Intro: **F# F# F# B**

Verse: **F# A#m B C# x2**  
**G#m D#m G#m A#m**

Chorus: **F# B C#**

I can't believe  
It's been a year since we met WWDC  
Oh I met somebody new  
But I promise it's nothing against you  
You remembered every date  
Knew the best places for dinner  
No it's not your weight  
Even she could be thinner

Oh I must confess  
I got my mac on  
With iPhone 3GS

I am amazed  
How did we go so long without cut copy paste  
Oh I should have guessed  
You would blame all our problems on your MMS restrictions

Oh once you were much quicker  
But your age has slowed you down  
Plus she takes better pictures  
Not to mention video and sound

Oh I must confess  
I got my mac on  
With iPhone 3GS

Oh but this is not goodbye  
You could always be my spare  
I prefer that anyway  
Cause I don't have apple care

Oh I must confess  
I got my mac on

With iPhone 3GS
