[Intro]

**G C G C7 G**

[Verse 1]

**G C G**

All I want is brick house

**C G**

With a porch that wraps around

**C G**

All I want is land enough

**C G**

For my children to run

**C G**

In the highest pitch of grace

**C G**

The end of trial and gratitude

**C G**

It was for you that all others I did forsake

**C G**

For you all others I would forsake

[Chorus]

**Em Am C G**

How could it have been so often that we did speak

**Em G C G**

Of purpose and of having of ha-having

[Verse 2]

**G C G**

Dreamt his body with his back to the lake

**C G**

Certain depths I cannot place

**C G**

Walk and talk fine through all of the days

**C G**

Still I miss the words you d say

**C G**

Past the point now of trusting it to change

**C G**

I ve just learned to live around it

[Chorus]

**Em Am C G**

Still, I will sleep too long or I will hardly rest at all

**Em G C G**

So from where does energy come-mmm-mmm-mmm

[Verse 3]

**G**                    **C**    **G**  
Meet me by the fire door  
**C**                                    **G**  
Of happiness I don't ask more  
   **C**                    **G**  
She is who I cut root vegetables beside  
**C**                                    **G**  
With you present in my mind  
   **C**                    **G**  
It is with them that we spend our nights  
**C**                                    **G**  
Laughter that tides through the rest  
   **C**                    **G**  
But I liked it best when the morning had not left  
**C**                                    **G**  
And wake was not yet in your eyes

[Chorus]

**Em**                                    **Am**  
High, high, high, low, low, low  
   **C**                    **G**  
I would have seen you through both  
**Em**                                    **G**
