Go Away
Katy B

```
  B                 G#m
I open my eyes, watch you lying there
    D#m
The sun beating on your skin
              B                   G#m
It became an unwritten rule with you
        D#m
Somehow I always seem to give in
              B
Why you got to be so strong
    G#m
Your stubbornness is cruel
      D#m
You know what I d do for you
              B
And I know where you d walk for me
    G#m
But we gotta speak it
D#m
Oh so quietly

                    B
If you could please just go away
G#m
Leave me alone
      D#m
Yeah, fly away
Into the stars
      B
Never see your face
        G#m                 D#m
It would make my world such a better place

    B                 G#m
You open your eyes, watch me lying there
D#m
What I d give to know what you see
                B                 G#m
What I d give to know what you feel, know what you think
    D#m
If only I could step in your skin
              B
But you see I already know
    G#m
It ll end in tears
        D#m
When you carry out all my fears
```

```
                   B
Being here s a dangerous game
       G#m
I ll end up insane
      D#m
And only have myself to blame

                             B
If you could please just go away
G#m
Leave me alone
       D#m
Yeah, fly away
Into the stars
       B
Never see your face
          G#m                      D#m
It would make my world such a better place

                  B
I know that you care

But it s never enough
                    G#m
I know you ll be there
But it s never enough
                  B
Please just play fair
                    G#m
I don t ask you for love
                              D#m
 Cause I don t need no empty words here

                  B
I know that you care
But it s never enough
                    G#m
I know you ll be there
But it s never enough, oh
                  B
Please just be fair
                    G#m
I don t ask you for love
                              D#m
 Cause I don t want your empty words here

Oh
                      B
If you could please just go away
G#m
Leave me alone
       D#m
Yeah, fly away
```

Into the stars
```
        B
```
Never see your face (never see your face, oh)
```
        G#m                        D#m
```
It would make my world such a better place

```
                          B
```
If you could please just go away

```
G#m
```
Leave me alone
```
        D#m
```
Yeah, fly away
Into the stars
```
        B
```
Never see your face (oh, I wish never met youuu)
```
        G#m                  D#m
```
It would make my world such a better place
If you could please just

```
B
```
Go away (go away)
```
G#m
```
Leave me alone
```
        D#m
```
Yeah, fly away (flay away)
Into the stars
```
        B
```
Never see your face
```
        G#m                  D#m
```
It would make my world such a better place
If you could plaese just
