

**Only You Can Love Me This Way**  
**Keith Urban**

The tab on the intro is played at the very beginning and as a transition from G to D throughout the verses. Just put it in wherever it sounds right in the song.

[Intro]

**G D**

```
e|-----|
B|--7\5-5\3-3\2-2p0-0--|
G|--7\6-6\4-4\2-2p0-0--|
D|-----|
A|-----|
E|-----|
```

[Verse 1]

```
G                                D
Well I know thereâ€™s a reason
G                                D
And I know thereâ€™s a rhyme
G                                D
We were meant to be together
Em Asus4
Thatâ€™s why----
G                                D
We can roll with the punches
G                                D
We can stroll hand in hand
G                                D
And when I say itâ€™s forever
Em Asus4
You understand---
```

[Chorus]

```
                                G
That youâ€™re always in my heart,
                                D
Youâ€™re always on my mind
                                G
But when it all becomes too much,
                                D
Youâ€™re never far behind
                                Bm
```

And there's no one that comes close to you

**F#m**

**E**

Could ever take your place

**G**

(Intro)

Cause only you can love me this way

[Verse 2]

**G**

**D**

I could have turned a different corner

**G**

**D**

I could have gone another place

**G**

**D**

Then I'd of never had this feeling

**Em**

**Asus4**

That I feel today, yeah..

[Chorus]

**G**

That you're always in my heart,

**D**

You're always on my mind

**G**

But when it all becomes too much,

**D**

You're never far behind

**Bm**

And there's no one that comes close to you

**F#m**

**E**

Could ever take your place

**G**

Cause only you can love me this way

[Instrumental]

**A Bm (x3) A**

[Chorus]

**G**

That you're always in my heart,

**D**

You're always on my mind

**G**

But when it all becomes too much,

**D**

You're never far behind

**Bm**

And there's no one that comes close to you

**F#m**

**E**

Could ever take your place

**G**

Cause only you can love me this way
