Stupid Boy
Keith Urban

Stupid Boy chords
Keith Urban

Capo III *

F C G 2x

```
     F          C              G
Well, she was precious like a flower
        F      C          G
She grew wild, wild but innocent
  F       C                  G
A perfect prayer in a desperate hour
        F         C          G
She was everything beautiful and different
```

```
      F   C  G
Stupid boy,   you can t fence that in
        F  C          F              C
Stupid boy,   it s like holding back the wind
   F              C              G
she let her heart and soul right in your hands
         F             C                  G
And you stole her every dream and you crushed her plans
      F              C            F
She never even knew she had a choice and that s what happens
G            F              C              G
When the only voice she hears is telling her she can t
       F  C      G
Stupid boy, stupid boy
```

Oh

```
F                  C              G
So, what made you think you could take a life
        F     C      G
And just push it push it around
  F       C              G
I guess to build yourself up so high
```

```
          F             C          G
You had to take her and break her down

      F               C                 G
she let her heart and soul right in your hands
        F             C                      G
And you stole her every dream and you crushed her plans
        F             C                 F
She never even knew she had a choice and that s what happens
G               F                 C               G
When the only voice she hears is telling her she can t
        F  C
Stupid boy,
        G                                         F
Oh, you always had to be right but now you ve lost
          C               G               F  C  G
The only thing that ever made you feel alive

Yeah, yeah

        F               C                 G
Well, she let her heart and soul right in your hands
        F             C                      G
And you stole her every dream and you crushed her plans

Yes, you did
      F               C   G       F           C
She never even knew she had a choice and that s what happens
G             F                 C               G
When the only voice she hears is telling her she can t
          F   C         G
You stupid boy, oh, I m the same old
                  F
Same old stupid boy

    F                     C               G
It took awhile for her to figure out she could run
            F       C   G
But when she did, she was long gone

Long gone, long gone

F C G 8x

Ah, she s gone

F                 C                 G
Nobody s ever gonna love me like she loved me
        F       C   G
And she loved me, she loved me
      F     C           G
God please, just let her know
      F       C       G
```

```
I m sorry, I m sorry
    F     C     G
I m sorry, I m sorry
      F     C     G
Baby, yeah, I m down on my knees
      F     C       G
She s never coming back to me . . .
```

* Alternate:

Capo I

F = **G**
C = **D**
G = **A**

Set8
