```
A                                              C#m
All of those times that you just go one running
B
Leads me to believe
There s a solitude you need
A                                              C#m
Takes you away to a place when your alone
B
How was I to know how this all would go?
A
I know we never talk about
C#m
Try to dace our way around it
B
My alarms they have sounded
If there s a fear I think we ve found it
```

Chorus

```
E                      A
Everything would be just fine
C#m                    B
If maybe we could pass the time, well
E                        F#m
We re leaving this all uncovered
C#m              B
For the demons to hold us down
E                             A
Everything in life could change
C#m                             B
From the moment that you walked away, well
E                       F#m        C#m        B
I don t want to leave uncovered, uncovered
```

Verse
```
A                                              C#m
Nothing I say ever seems to make you understand
B
We got together anyway just not quite the way we planned
A                                      C#m
As I run over that same moment in my mind
```

B
There s got to be another way for us to pass the time
A
When you feel broken bent or bound
C#m
I will keep you safe and sound
B
It s a fight you cannot win
Let the story line begin again

Everything would be just fine

If it s nothing like you said
A
Your like a book I ve never read

I d still want to be inside of you
B   **E**
Let s take it for a ride tonight
