

**A Country Boy For Christmas**  
**Kira Isabella**

This isn't spot on. I'm not sure about a few chords and a couple technical things, but it's pretty daggone close and it's something to work with. Also, the spacings are a little different than they are written because it kept moving the chords from where I put them. They are actually supposed to be more evenly spaced...soo...sorry about that, but...here ya go!

Opening Riff play twice at beginning (also used throughout song in background and when otherwise specified)

```
e-----8-----8-----8-----8-----10-----10-----|
