Ark Of Godiva Kleenex Girl Wonder

G# D#m I think she ll do fine G# She goes out for water and comes back with wine Little men standing side by side Get on your horse and let s go for a ride Two by two all the patrons arrive Gaze in disgust just to know you re alive G# All this beauty is too much to describe G# Pillars of salt comprise the bulk of my tribe But there s a girl and she s crying Cause she thinks she someone else And it s not for lack of trying But she s poisioning herself G# All the time we look towards the skies G# Young men undress our fair queen with their eyes D#m And she likes to think they re blind C# But such hideous thoughts find a home in their minds G# So she rides to the great divide G# C# Says something of beauty, how it s on the inside D#m And she lets her stallion die Gets on the ship and heads off for the sky But there s a man and he s been drinking Cause he thinks she s long since dead

But she s not drowned yet, just sinking
