KLEVELAND

<http://www.klevelandmusic.com/>

I knew about this band about 3 weeks ago, and I do really like them, their music is

rock and roll and well I hope you like it too.

I had the opportunity to watch them live and they are really really good and for me that

what really matters, to see what a band live can do.

So you can listen this song and more on www.myspace.com/kleveland

Hope you like it

Intro:

B E A F# A B//

B

Fill up your gas tank

All by yourself

E

Over state lines it s a self service world

A F# A B

You ve got to keep going, get away from her

B

But you ll feel alright once at city limits

E

There is another you re going to visit

A F# A B

She s always open, good in a crisis

Chorus

B

Follow paths of least resistance

D

Don t know the difference(**G A F# A B**)

B

I should not be surprised but I am

D

Can t go the distance (**G A F# A B**)

Well things did not work out

exactly as planned

It started as love,

Then you start to feel scammed

And so you ducked out with a note on the door

Don t you just wish girls

Were like your old cars

You take out their keys
And change out their bad parts
Get under the hood, then you re done

(**B A G F#**)**** The whole bridge are just this chords****
No matter where you go
Or how far you drive
Try to forget, baby try to hide
You can t escape the past
It wants its due
and what you ve done will take it s toll on you

So why don t you join me
I ll be your host
Rip out your heart
Raise it up in a toast
To easy come, and easy go
It s safer to give up than is to give in
Someone gets shattered
But you ve got to admit
It s kind of a thrill
And you re good at it

****ending **G A F# A G A**
A B****
