GUITAR TAB

Tabbed By Aaron Fornarino

As I said for the bass tab it was rather dissapointing not to find this song as it is really easy to play. I have included the timing and the changing parts. I figured that there is only one way to play this song and that is in Drop D it is too fast for normal power chords and it s much easier to slide up and down the neck. ENJOY! :)

Drop D Tuning : D A D G B E

Key : / = Slide Down
 = Slide Up
 * = Palm Mute (Apart From Different Noted Meanings)
 > ^ = harmonics

This first guitar riff doesn t start until (0:55 secs) into the song. Play this very fast as it s difficult to tab all the palm muted notes I suggest playing with the song to get the timing. Play both parts twice
i.e. -1--1:A--1--1:A-

-1- (0:55 secs)

```
D --7-7*-7*-7*-7*-7*-7*-12--12-/-10-7*-7*-7*-7*-5--7--8--10----|
A --7-----12--12-/-10-----5--7--8--10----|
D --7-----5--7--8--10----|
G -----|
B -----|
E -----|
```

-1:A- (0:59 secs)

```
D --7-7*-7*-7*-7*-7*-7*-12--12-/-10-7*-7*-7*-7*-7*-7*-----|
A --7-----12--12-/-10-----|
D --7----->7-7-7-77-7-7-7
