     C   **D**   **Em**
 If someone said three years from now
                 G
 You d be long gone
     C   **D**   **Em**
 I d stand up and punch them out
                          G
Cause they re all wrong
                              C   **D**
 So raise your glass if you are wrong

                                      C
 Cause where there is desire
                                          G
 There is gonna be a flame
                                          D
 Where there is a flame
                                              Em
Someone s bound to get burned
                              C
 But just because it burns
                                              G
Doesn t mean you re gonna die
                 D
Gotta get up and try, try

```
Em            C            G
 I m safe, up high, nothing can touch me
 Em                 D                   Bm 
And we re not broken just bent
                      D                         Em
 and we can learn to love again 
Em            C            G
 No pain, inside, you re my protection
 Em                  D                   Bm
 And we re not broken just bent
                      D                   C
 and we can learn to love again

                  C
Gotta get up and try, try
