Verse 1:

                  EmAdd9                  **A/F#**  
Youâ€™ve been down the dark detours  
                  **A**                                  **A/F#**  
You have seen most of it all  
                  EmAdd9                  **A/F#**  
Crashed into the million faces  
                  **A**                                  **A/F#**  
But never listened to them talk  
                  EmAdd9                  **A/F#**  
Youâ€™ve got so much on your mind right now  
                  **A**                                  **D**      **E**  
It doesnâ€™t even help to try to solve them all

                  EmAdd9                  **A/F#**  
You used to smile when hope and a pat on the back  
                  **A**                                  **A/F#**  
Would last throughout the day  
                  EmAdd9                  **A/F#**  
As the rain kept falling down on you  
                  **A**                                  **A/F#**

You wouldn't let them wash the feeling away
