

## Wide-Eyed Legless

Laura Veirs

Hey guys. I heard this song and loved it, so I thought I'd figure out the chords...Here's what I got, so I figured I'd share. Hope it works! Here goes.

For the verses: **G#m B F# E**

For the chorus: **B E G#m F#**

1st Verse:

**G#m**                    **B**  
Down among the dead  
                         **F#**                                    **E**  
The wide-eyed and the legless, only half a head  
**G#m**                    **B**  
Half a mouth to laugh from the porthole  
**F#**                                    **E**  
With the more than faded epitaphs

**G#m B F# E** x2

Chorus:

**B**                                    **E**                                    **G#m**                                    **F#**  
Will you ever more tie up my hair with velvet bows?  
**B**                                    **E**                                    **G#m**                                    **F#**  
Will you ever more pull out the splinters from my toes?  
I don't think so

2nd Verse:

**G#m**                                    **B**                                    **F#**  
Out in the hornet rain the swarming stingers  
   **E**  
Pumping poison through my veins  
**G#m**                                    **B**  
Lacking on the star-crossed lover's map  
**F#**                                    **E**  
Take the beating lash, lash for lash

**G#m B F# E** x2

Chorus:

**B**                                    **E**                                    **G#m**                                    **F#**

Will we ever more kiss on the boardwalks fading red?

**B**                                **E**                                **G#m**                                **F#**  
In the light of the waves and the comets waning tail  
I don t think so

Outro (Play x4):

**G#m**                                **B**                                **F#m**  
No more looking back, looking back, looking back  
**E**  
Faded epitaph

Close with:

**G#m B F# E** (x2)

And that s it. Hope you guys like it. I might also submit a tab version of it sooner or later because the actual notes for it aren t very tough. I just need to get it in guitar form. Anywho, enjoy.
