This is my interpretation of the song and is what I hear. Since U-G doesn't always include the correct chord voicings, I have included all of them in this transcription. Please feel free to experiment with your own chord voicings.

Quite a few chords on this song. On some of them, I've included duplicates. The first is an open chord and the second is a barre version. Listing more than one version of the same chord gives you the opportunity to stay in the same area of the neck for greater efficiency.

Due to the vast number of chords used in this song, I have set the difficulty to intermediate. Intermediate and better guitar players should have no problem playing this song.
