

Wine Glass

Leddra Chapman

Hi guys, this is my 2nd Leddy tab. The credit for this must go to the person who tabbed the 1st version which is dropped down half a step. For those of you like me that prefer not to tune down I have put this tab together. It sounds pretty good if you make sure you keep the high e and B string open for the entire song. Listen to the song for timing and just have a play about. If you want to play finger picked then I recommend the other version as you ll need to drop your tuning. Enjoy :)
