

Lovebird

Leona Lewis

D# A# Cm G#

I will lay down next to you
Stay in bed all afternoon
We were birds of a feather
We were always together

And I never will forget
All the little things you said
And that beautiful summer
You used to call me your love bird.

But the time went on
The wind has blown
And I have grown
And I started a feeling
That my wings have been broken

Fm Cm Fm
And I can't believe that I would ever want to be set free
G#
But I just can't stay

A# D#
So your love bird's flying away
A#
Your love bird's flying away
Cm
Cause my heart's been stuck in a cage
G#
Gotta sing my song so pretty, dum dum diddy
D# A#
And I'll miss you everyday
Cm
Cause there's nothing left to say
G#
Gotta sing my song so pretty, dum dum diddy

D# A# Cm G#

I want the world at my feet
Even if it's bittersweet
I wanna stand on my own and
Hold my heart in my own hands.

Cause I ve begun to see
That you and me
Are different breeds.
So I gotta be leaving,
Gotta get back to breathing
