

**Hard Fight
Levellers**

this is my first submission thought id just do the chords as there is alot of people who realy read tabs, the rythem is prety simple if you know the song so you should be able work it out. any corrections or comments are welcome, this is just how i play it.use bar for the chorus i think it sounds better thers a similar version on the levellers site as well which is the only other place this song is.
