[Intro]   G Em Bm

G   Em   Bm
It ain t no wonder why we lose control
                    G   Em   Bm
When we re always a heart attack away from falling in love
G   Em   Bm
Well, I know that we ve been hardly holding on
G   Em   Bm
To tell the truth, I can t believe we got this far
C   A
Running near on empty

                              D Dsus4 D5
I wish somebody would ve told me

                   G   Bm
That I d end up so caught up in need of your demons
                 C   Cm
That I d be lost without you leading me astray
                 G   Bm
Guess that I m a fool for the way that you caught me
             C   Cm
Girl, you make my heart break more every day
             G
But don t fade away

           G   Em   Bm
And when I m just about to pass the point of it all
        G   Em   Bm
You come ripping all the air from out of my lungs
C   A
And now it s so hard to be
                      D Dsus4 D5
I wish somebody would ve told me

                   G   Bm
