

Silver Blue

Linda Ronstadt

Silver Blue

**B        B9        B    B9**

Silver Blue

**C#m7                F#**

Say goodbye to no-one

**B                B9                B    B9**

Thought it through

**C#m7                                F#    B**

And left me standing in the road

**E                F#**

If you were ever lonely

**B    F#        G#m**

You never show

**C#7                                F#                E        D#m    B**

But someday baby you ll be here and I ll be going home

Without you

And blood on both my hands

Cause I took you through

And now we re both to weak to stand

You think you re gonna live forever

And somehow find me there

But you ll be wearing golden wings and fall right thru the air

Loving you,

Well I m a fool for tryin

Cause I get so blue

that I dont know if I m cryin

**E                Em**

If you are ever lonely

**B    F#                G#m**

And you let me know

**C#7                                F#                E        D#m    B**

I ll come running right on time to rock you gently home

**B                B9    B                B9    B**

Silver Blue, Silver Blue
